

evince documentation

Technical Requirements

Minimum system requirements

The following specification is recommended for running both evince and the Report Manager. This takes into account the planned development strategy of evince.

Hardware

- CPU - 1.2 GHz
- Memory - 256 MB RAM
- Hard Disk - 100 MB Available Space
- 1024 x 768 minimum screen resolution

Operating System

- Windows XP or later

Software

- Internet Explorer 6 SP1 or later
- (Optional) Adobe Acrobat (for advanced report viewing)
- (Optional) Ability to install ActiveX components (for advanced report viewing)

Internet connectivity

- A high speed broadband internet connection, which should be the greater of:
 - 256k available bandwidth or
 - 64 KBps available bandwidth per required user

Note: the current internet connectivity used for hosted iChIS will be sufficient

- TCP port 80 (HTTP) open outbound
- TCP port 443 (HTTPS) open outbound

Reports Manager

Users wishing to create or edit reports, must first install the reports manager on their local PC. Users who only wish to run existing reports can do so from within evince and do not need to install the reports manager.

A ClickOnce application is available for download from evince and will automatically install the reports manager on your local PC. Detailed documentation on the installation process and how the reports manager interacts with Opportunity Links servers, is available on request.
